RP-UHPLC processed trace, UV detection

Record 6BAV759-BLD-01; duplicate independent preparations. System suitability met retention-time and resolution criteria; blank response was below threshold.

Related species were assigned by orthogonal reference comparison and mass-spectrometric or chromatographic evidence. Mean area percentages; reporting threshold 0.05%.

Conclusion

Multiplex LC-MS confirmed every declared component. Individual assays were 10.01 mg BPC-157, 10.02 mg TB-500, 49.90 mg GHK-Cu; peptide-related chromatographic purity was 99.18%.

Blend content was quantified component-by-component against qualified references. The purity figure describes resolved peptide-related substances, not the proportion of any one component.
