RP-UHPLC processed trace, UV detection

Record 374YEL8-PEP-01; duplicate independent preparations. System suitability met retention-time and resolution criteria; blank response was below threshold.

Related species were assigned by orthogonal reference comparison and mass-spectrometric or chromatographic evidence. Mean area percentages; reporting threshold 0.05%.

Conclusion

Identity and quality attributes met the stated criteria. Mean Kisspeptin-10 content was 9.98 mg/vial and chromatographic purity was 99.33%.

Identity was established by LC-HRMS against a qualified reference; content and related substances were assessed independently.
